
Is design important?

with user in mind

none in mind

1 in 4 people
abandon app after only
one use

62% of people
are using apps only
11 times

Why?

**Let's look at our
experience and point out
some of the reasons**

This is a **recognised** challenge

The work of a **designer** is to
answer this challenge

How does he do it?

A designer is not an alien.

When a designer is designing is using
some **mindset and practices that
has been identified.**

These practices are easy to understand and rotate around **2 keywords:**

Empathy

Human

How does design work?

What is a designer doing?

Let's try:

**We are a group of 5 people and
we need to have dinner**

**This mindset is called
DESIGN THINKING**

This mindset is used in:

Agile Human Lean etc
centred
design

Empathy + Human

Understand the needs

Go deep (use the tools!)

Tools

Sociology

Anthropology

The basic?
Ask questions

Basic questions areas:

What?

Who?

Why?

When?

Where?

How?

This mindset can be used when
designing

Products - Services

What is a software?

Product - Service

SERVICE

**Something that produce
value when in the hands of
the user.**

Let's try!

Design thinking workshop

90 minutes

What is Agile?

2001

Manifesto of **agile** software development

We are uncovering better ways of
developing software by doing it and
helping others do it.

Through this work we have come to value:

Individuals and interactions over **processes and tools**

Working software over **comprehensive documentation**

Customer collaboration over **contract negotiation**

Responding to change over **following a plan**

That is, while there is value in the items on the right, **we value the items on the left more.**

Agile

is an
interdisciplinary approach

the user is always in the middle

Scrum

XP

Kanban

Scrum

Is one of the most used agile methodologies

XP

Short for “Extreme Programming”
Is focused on coding methodologies
extended forward to project management

Kanban

Is a set of method that help reduce work in progress. It is implemented in the other 2.

stakeholders.

Stakeholder

Direct Users
Indirect users
Gold owner
Investors

.... Anyone “touched”
by the project

Topic of the course:

In order to keep you motivated during all the lessons and the duration of the course we decided to ask them to design and develop their own idea.

Common topic:

Design a Game

Every projects will need to include:

- **Location service in Android system (GPS and AGPS)**
- **Map service of Google (or alternative)**
- **GCM service of Google (or alternative)**
- **NFC 3 modes, NFC target, NFC initiation and NFC P2P**
- **Material design of Android 5.0**
- **Utilise the camera of the device**
- **Augmented Reality**

We are few people so we will work as a **small company.**

Use the **classroom as your office.**

Case study: **Spotify**

Before starting a project:

Homework for 22 April 2017:

- **Define roles in your Agile team**
- **First idea for the project**
- **Draft of WBS**
