**In your Agile Teams**

**5 minutes: Daily stand-up**

**What did I accomplish yesterday?**

**What will I accomplish today?**

**What obstacles are impeding my progress?**

---

**What happens when a company  
works using agile?**

**The Spotify case study**

---

# How to write stories?

---

The persona is the protagonist of the  
**Agile User Story**

- A** As a persona
  - B** I want to do something
  - C** so that I can derive a reward
-

- 
- Who is this user?
  - What makes them click?
  - Who's an example of such a person?

- A** As a persona
- B** I want to do something
- C** so that I can derive a reward

- Why do they want to do this?
- What's the benefit / reward?
- How we will know if it is working?

---

**EPIC Story: I’m going to drive from A to D**

**Story 1: I’m going to drive from A to B**  
**Story 2: I’m going to drive from B to C**  
**Story 3: I’m going to drive from C to D**

---

---

**Example:**

## **Epic story**

**As Ted the Audi technician, I want to  
identify a part that needs replacing  
so I can decide my next steps**

---

Example:

## Epic story

**As Ted the Audi technician, I want to  
identify a part that needs replacing  
so I can decide my next steps”**

---

## Epic story

**As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”**

## Child story

**I want to see the cost of the part and the time needed to receive it so I can decide on next steps and get an agreement from the customers**

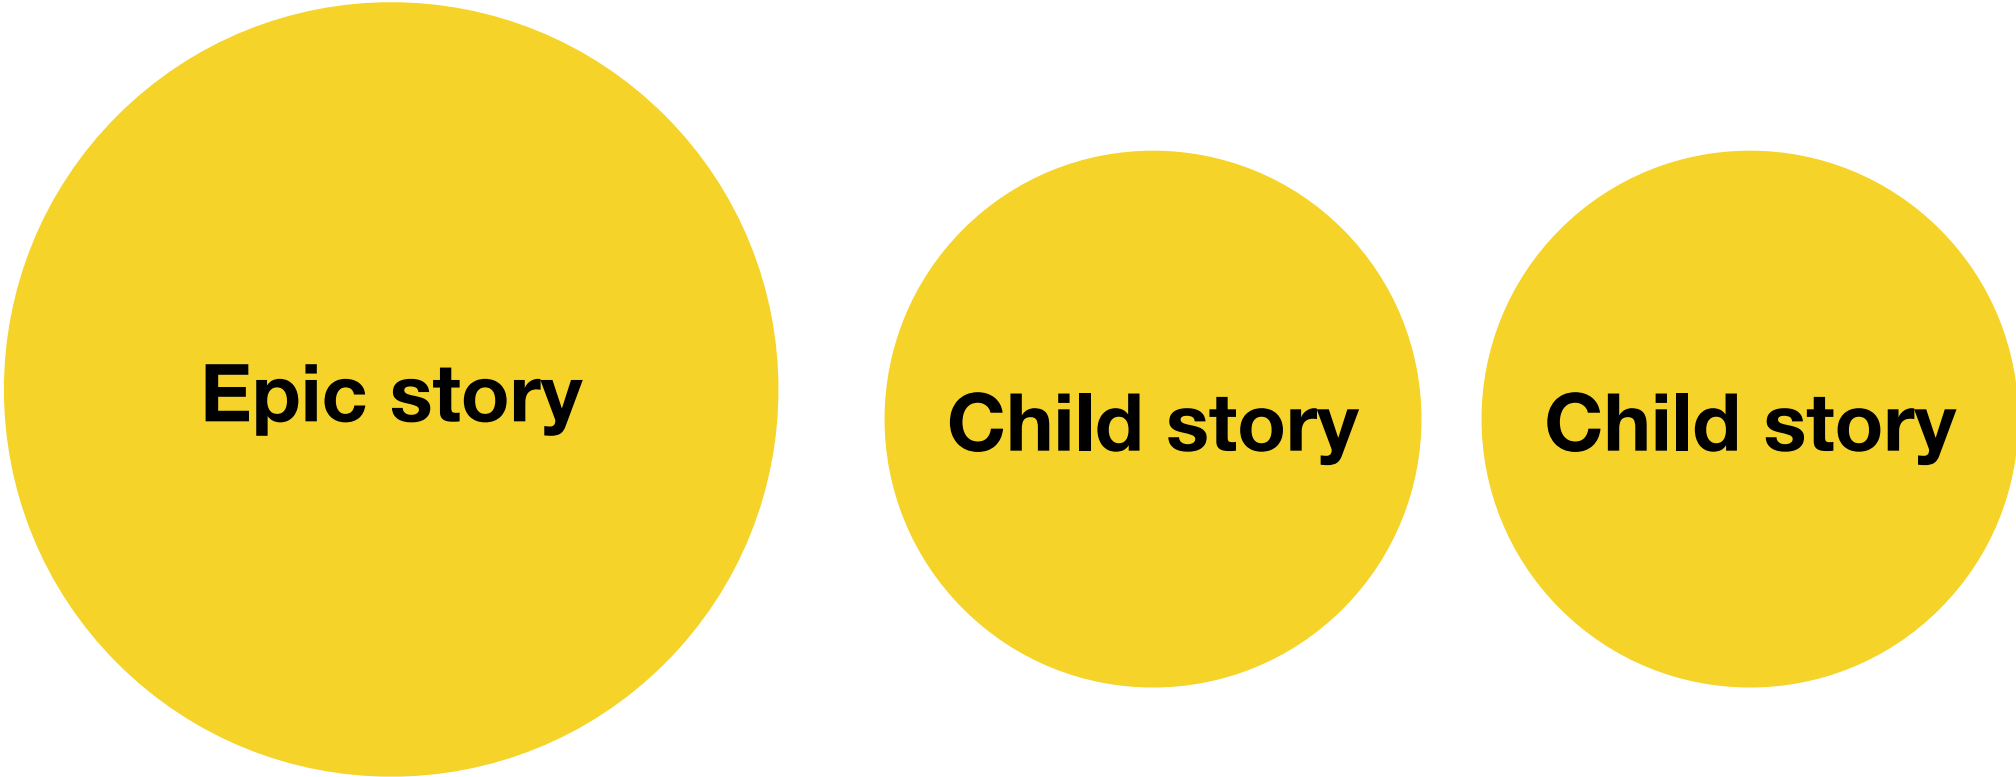

---

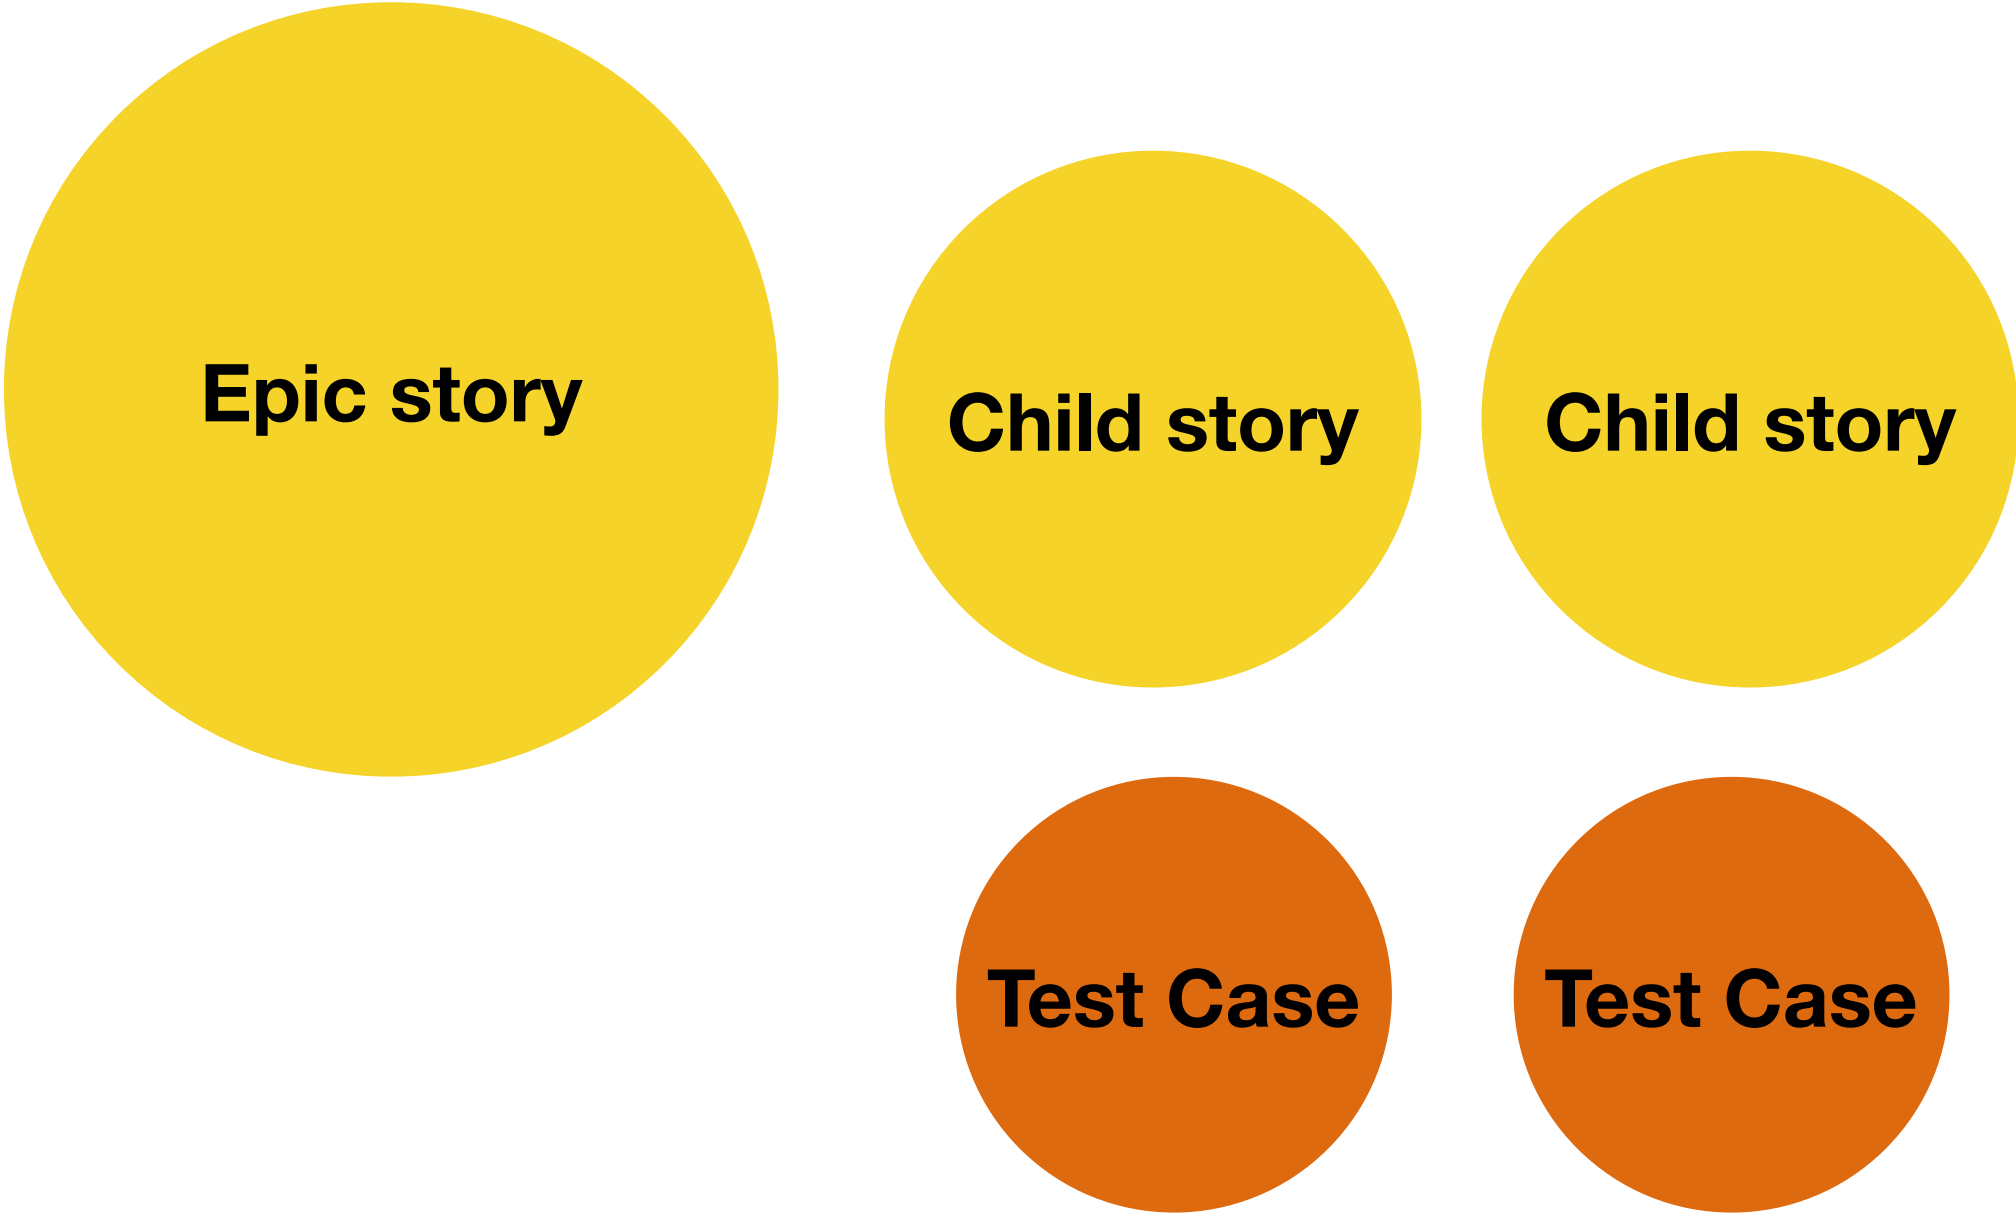

## Epic story

**As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”**

## Child story

**I want to see the cost of the part and the time needed to receive it so I can decide on next steps and get an agreement from the customers**

---

## Epic story

**As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”**

## Child story

**I know the part number and I want to find it on the system so I can figure out next steps on the repair**

## Test Case

**???????**

---

## Epic story

As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”

## Child story

I know the part number and I want to find it on the system so I can figure out next steps on the repair

## Test Case

**Make sure it is possible to search by part numbers  
+  
add description to help them avoiding ordering the wrong thing**

**The purpose is to layer more details to child stories**

**These are “testable formulations” of the story**

**Something you can “test” and collect feedback from it.**

---

**The **Problem scenario** is an upper layer you use to organise Epic stories.**

---

---

## Epic story

As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”

## Child story

I know the part number and I want to find it on the system so I can figure out next steps on the repair

## Test Case

Make sure it is possible to search by part numbers

+

add description to help them avoiding ordering the wrong thing

---

## Problem scenario:

### Preparing technicians for the job

#### Epic story

As Ted the Audi technician, I want to identify a part that needs replacing so I can decide my next steps”

#### Child story

I know the part number and I want to find it on the system so I can figure out next steps on the repair

#### Test Case

Make sure it is possible to search by part numbers

+

add description to help them avoiding ordering the wrong thing

---

When we write user stories we are primarily focused on:

**“How do we provide  
good experiences  
for the users?”**

Basic questions areas:

What?

Who?

Why?

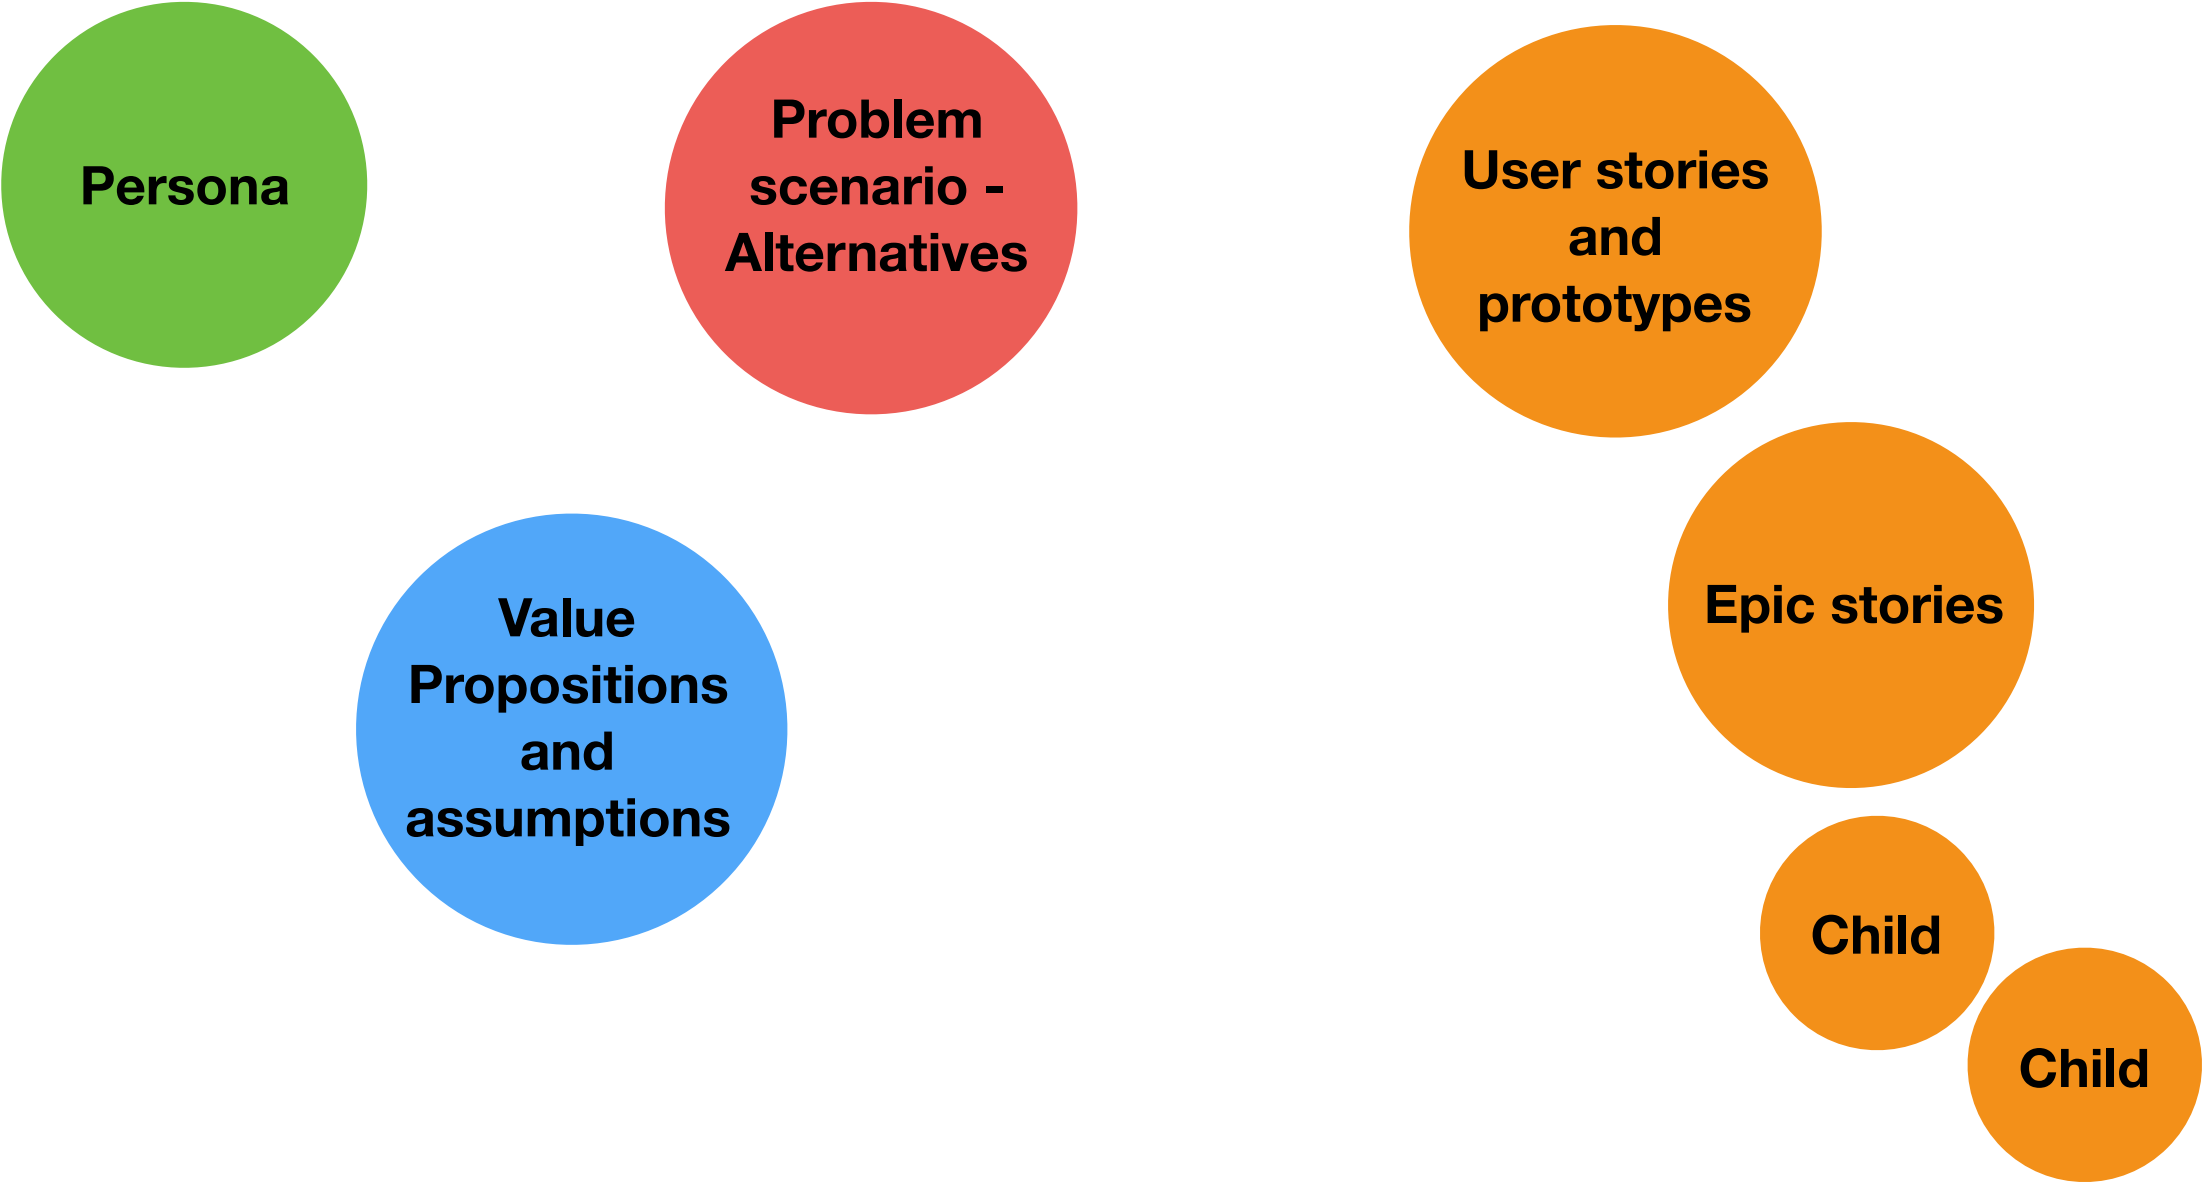

When?

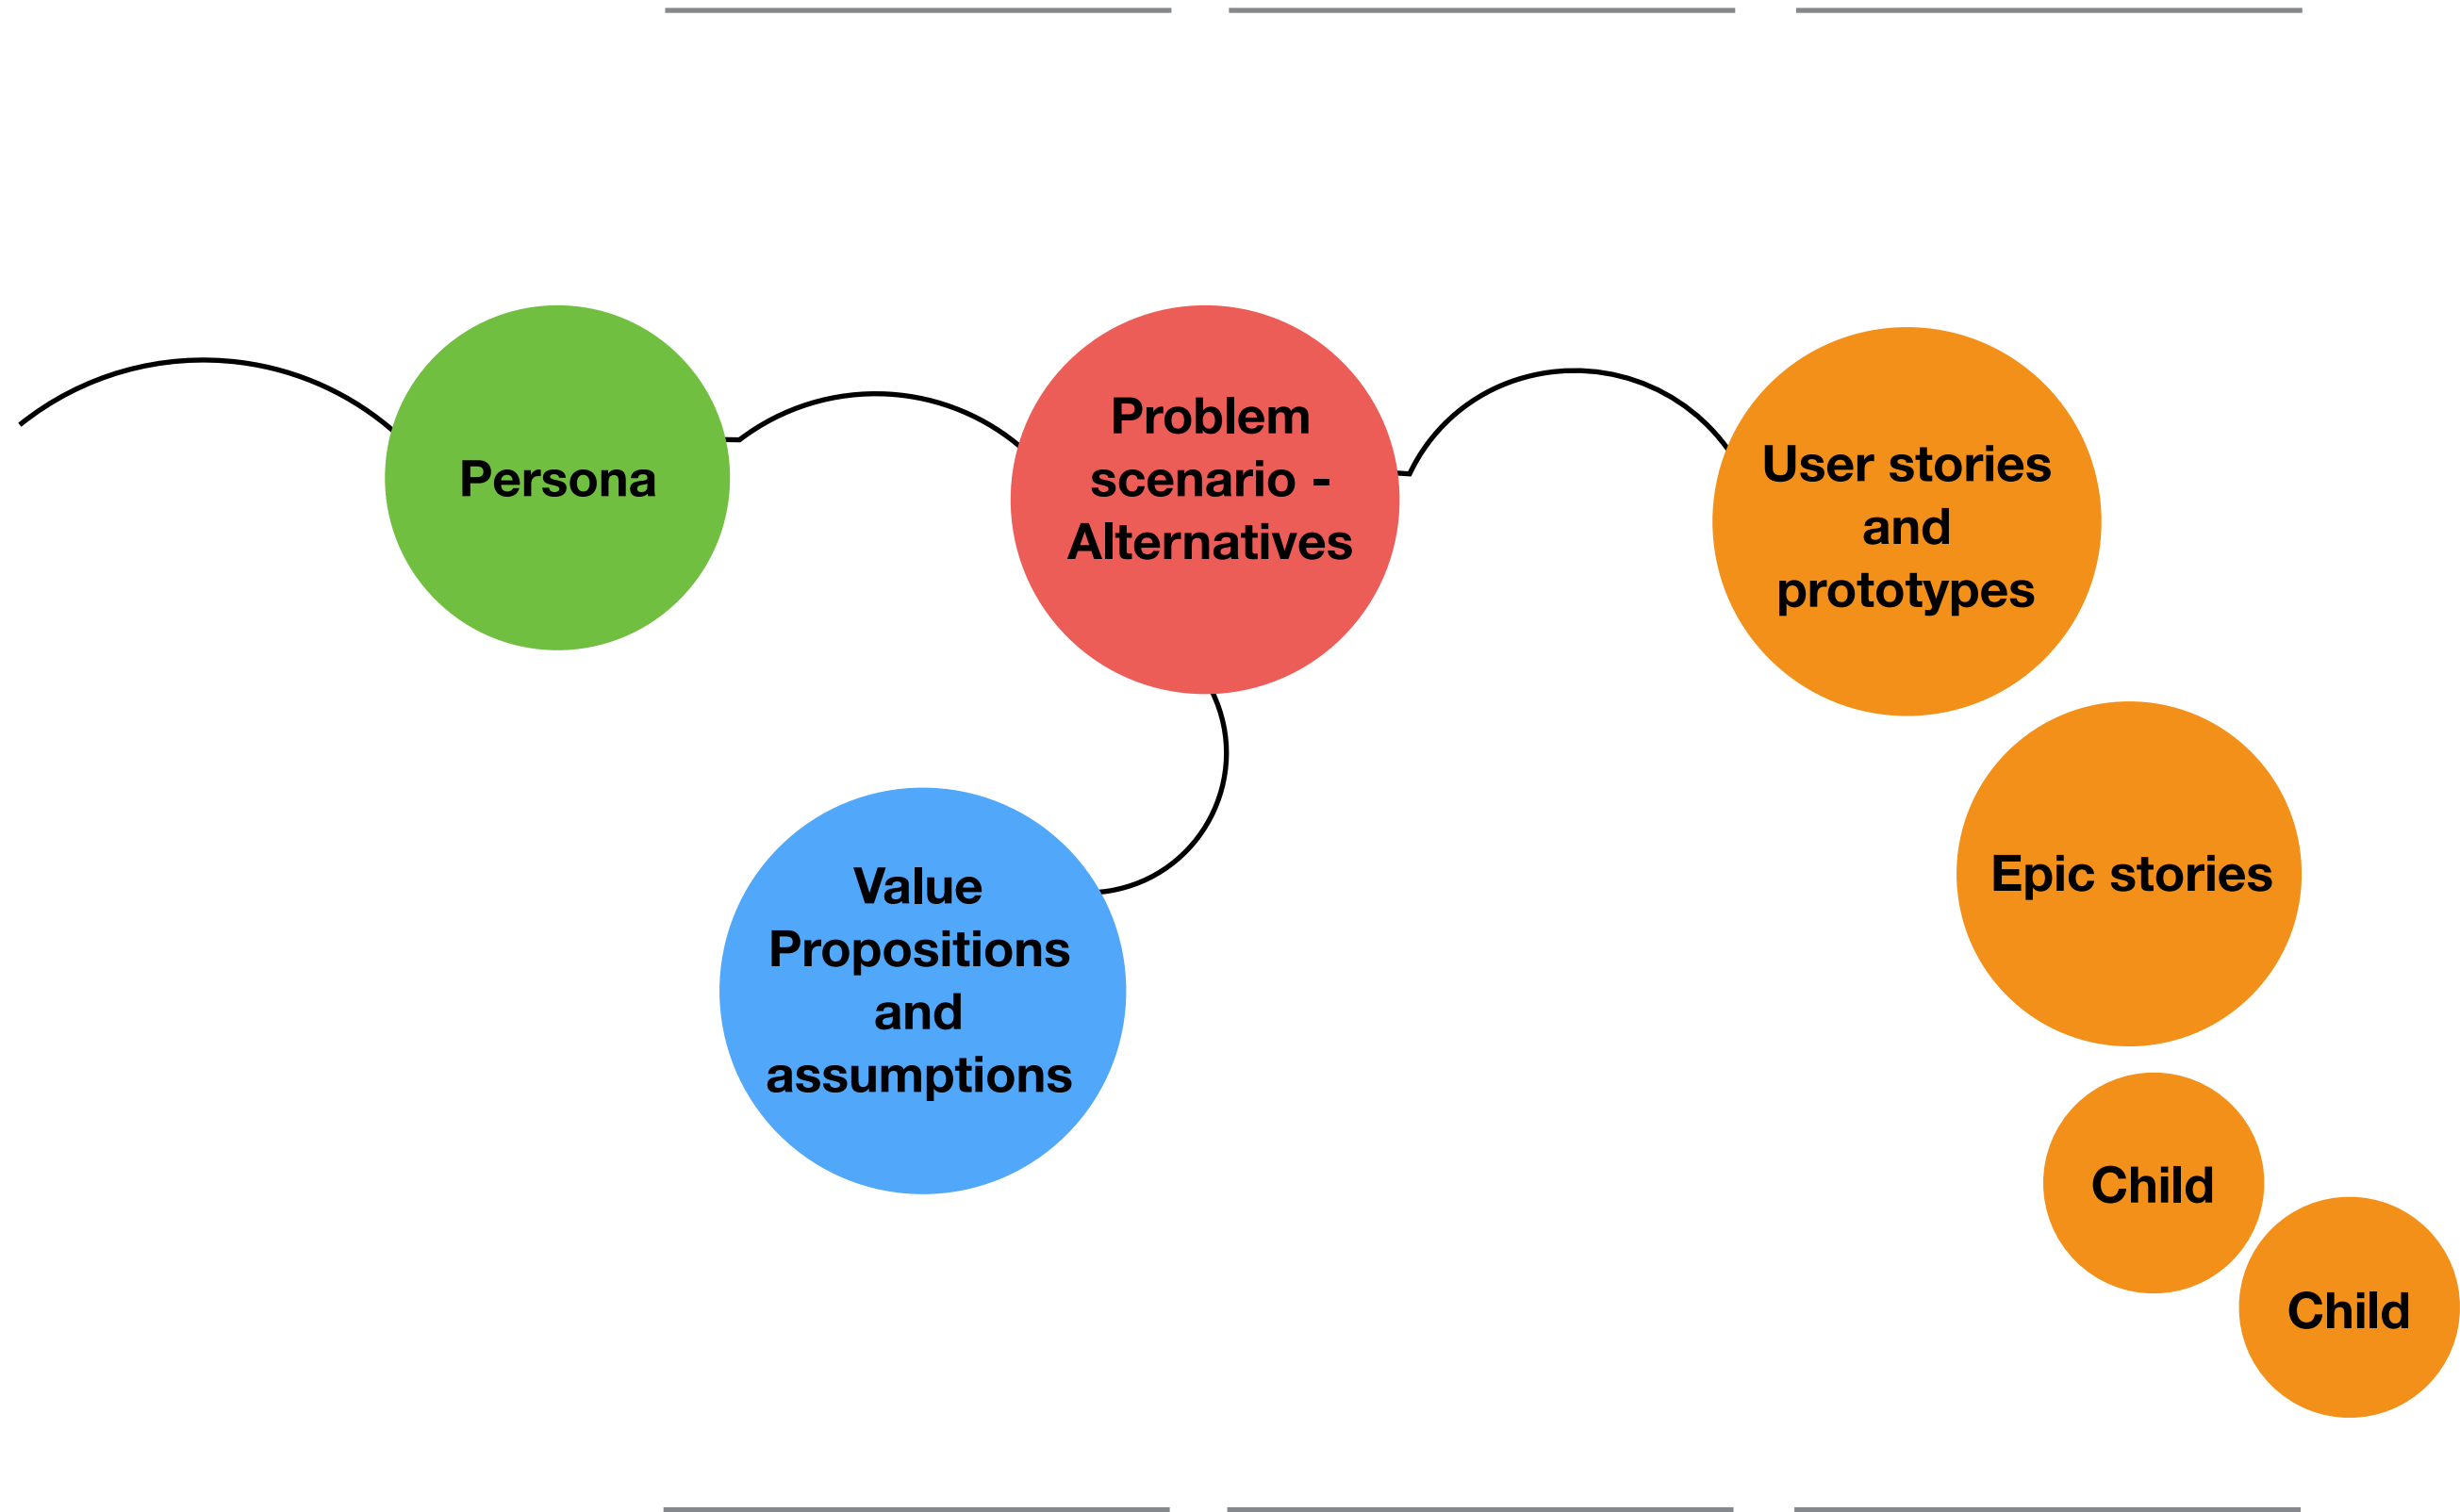

Where?

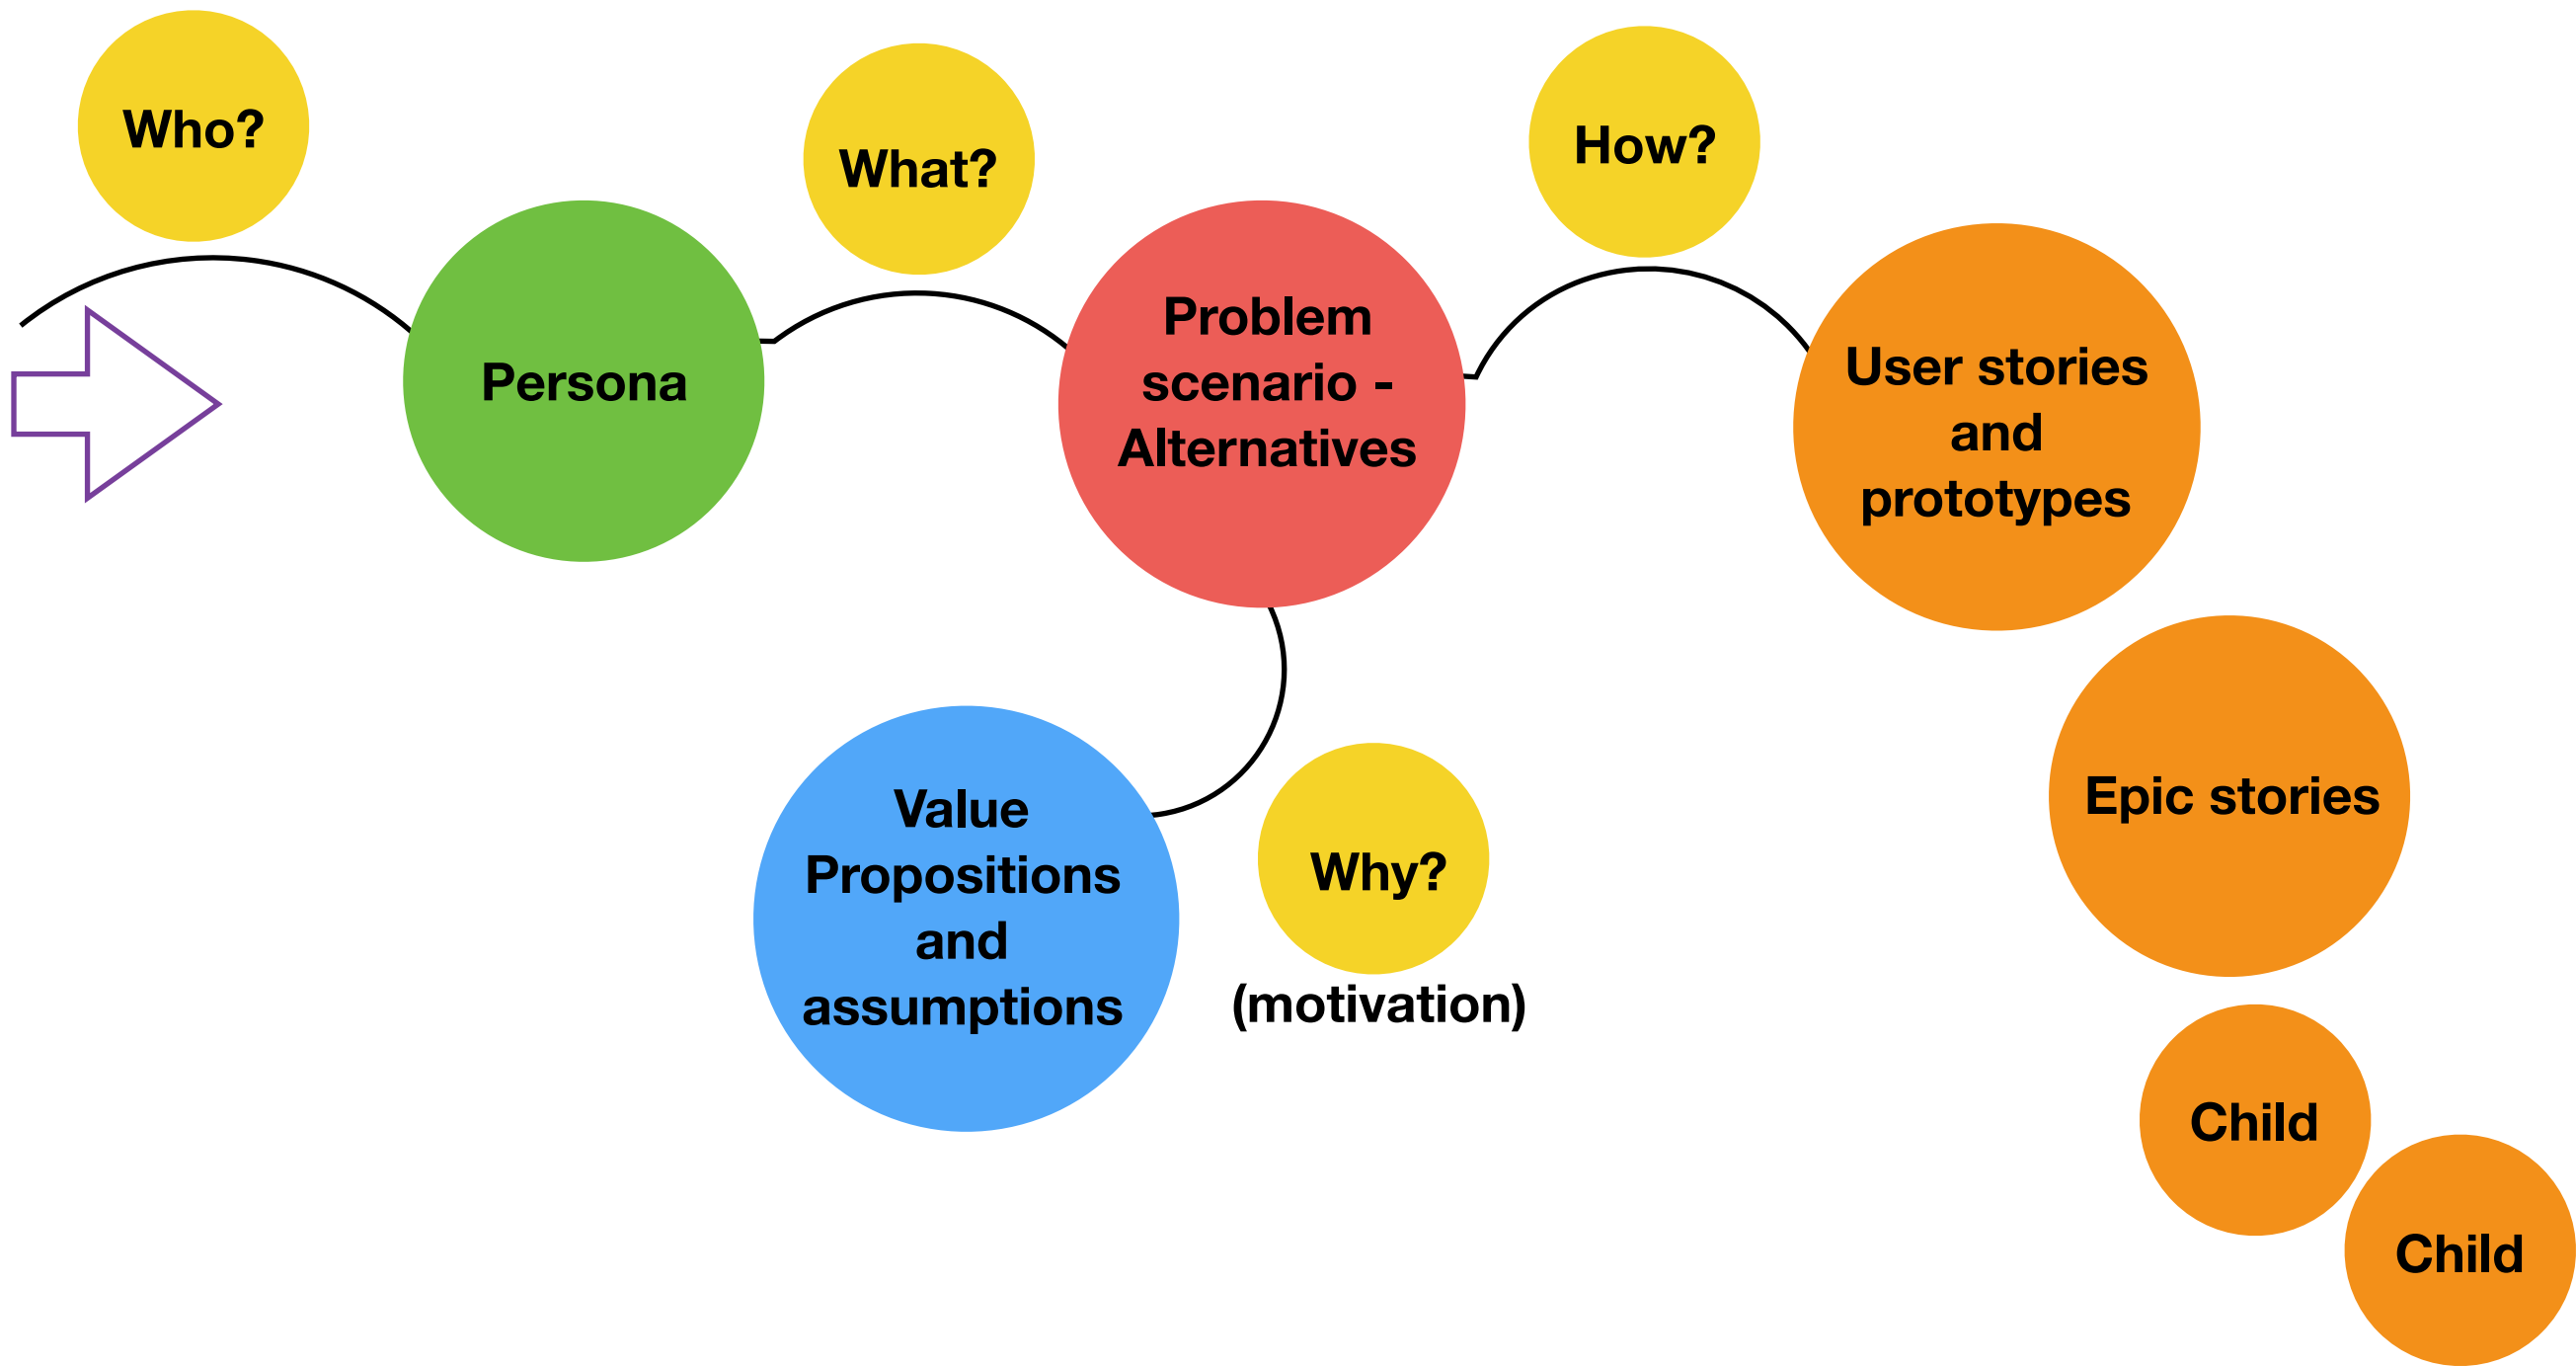

How?

---

# How can we use stories?

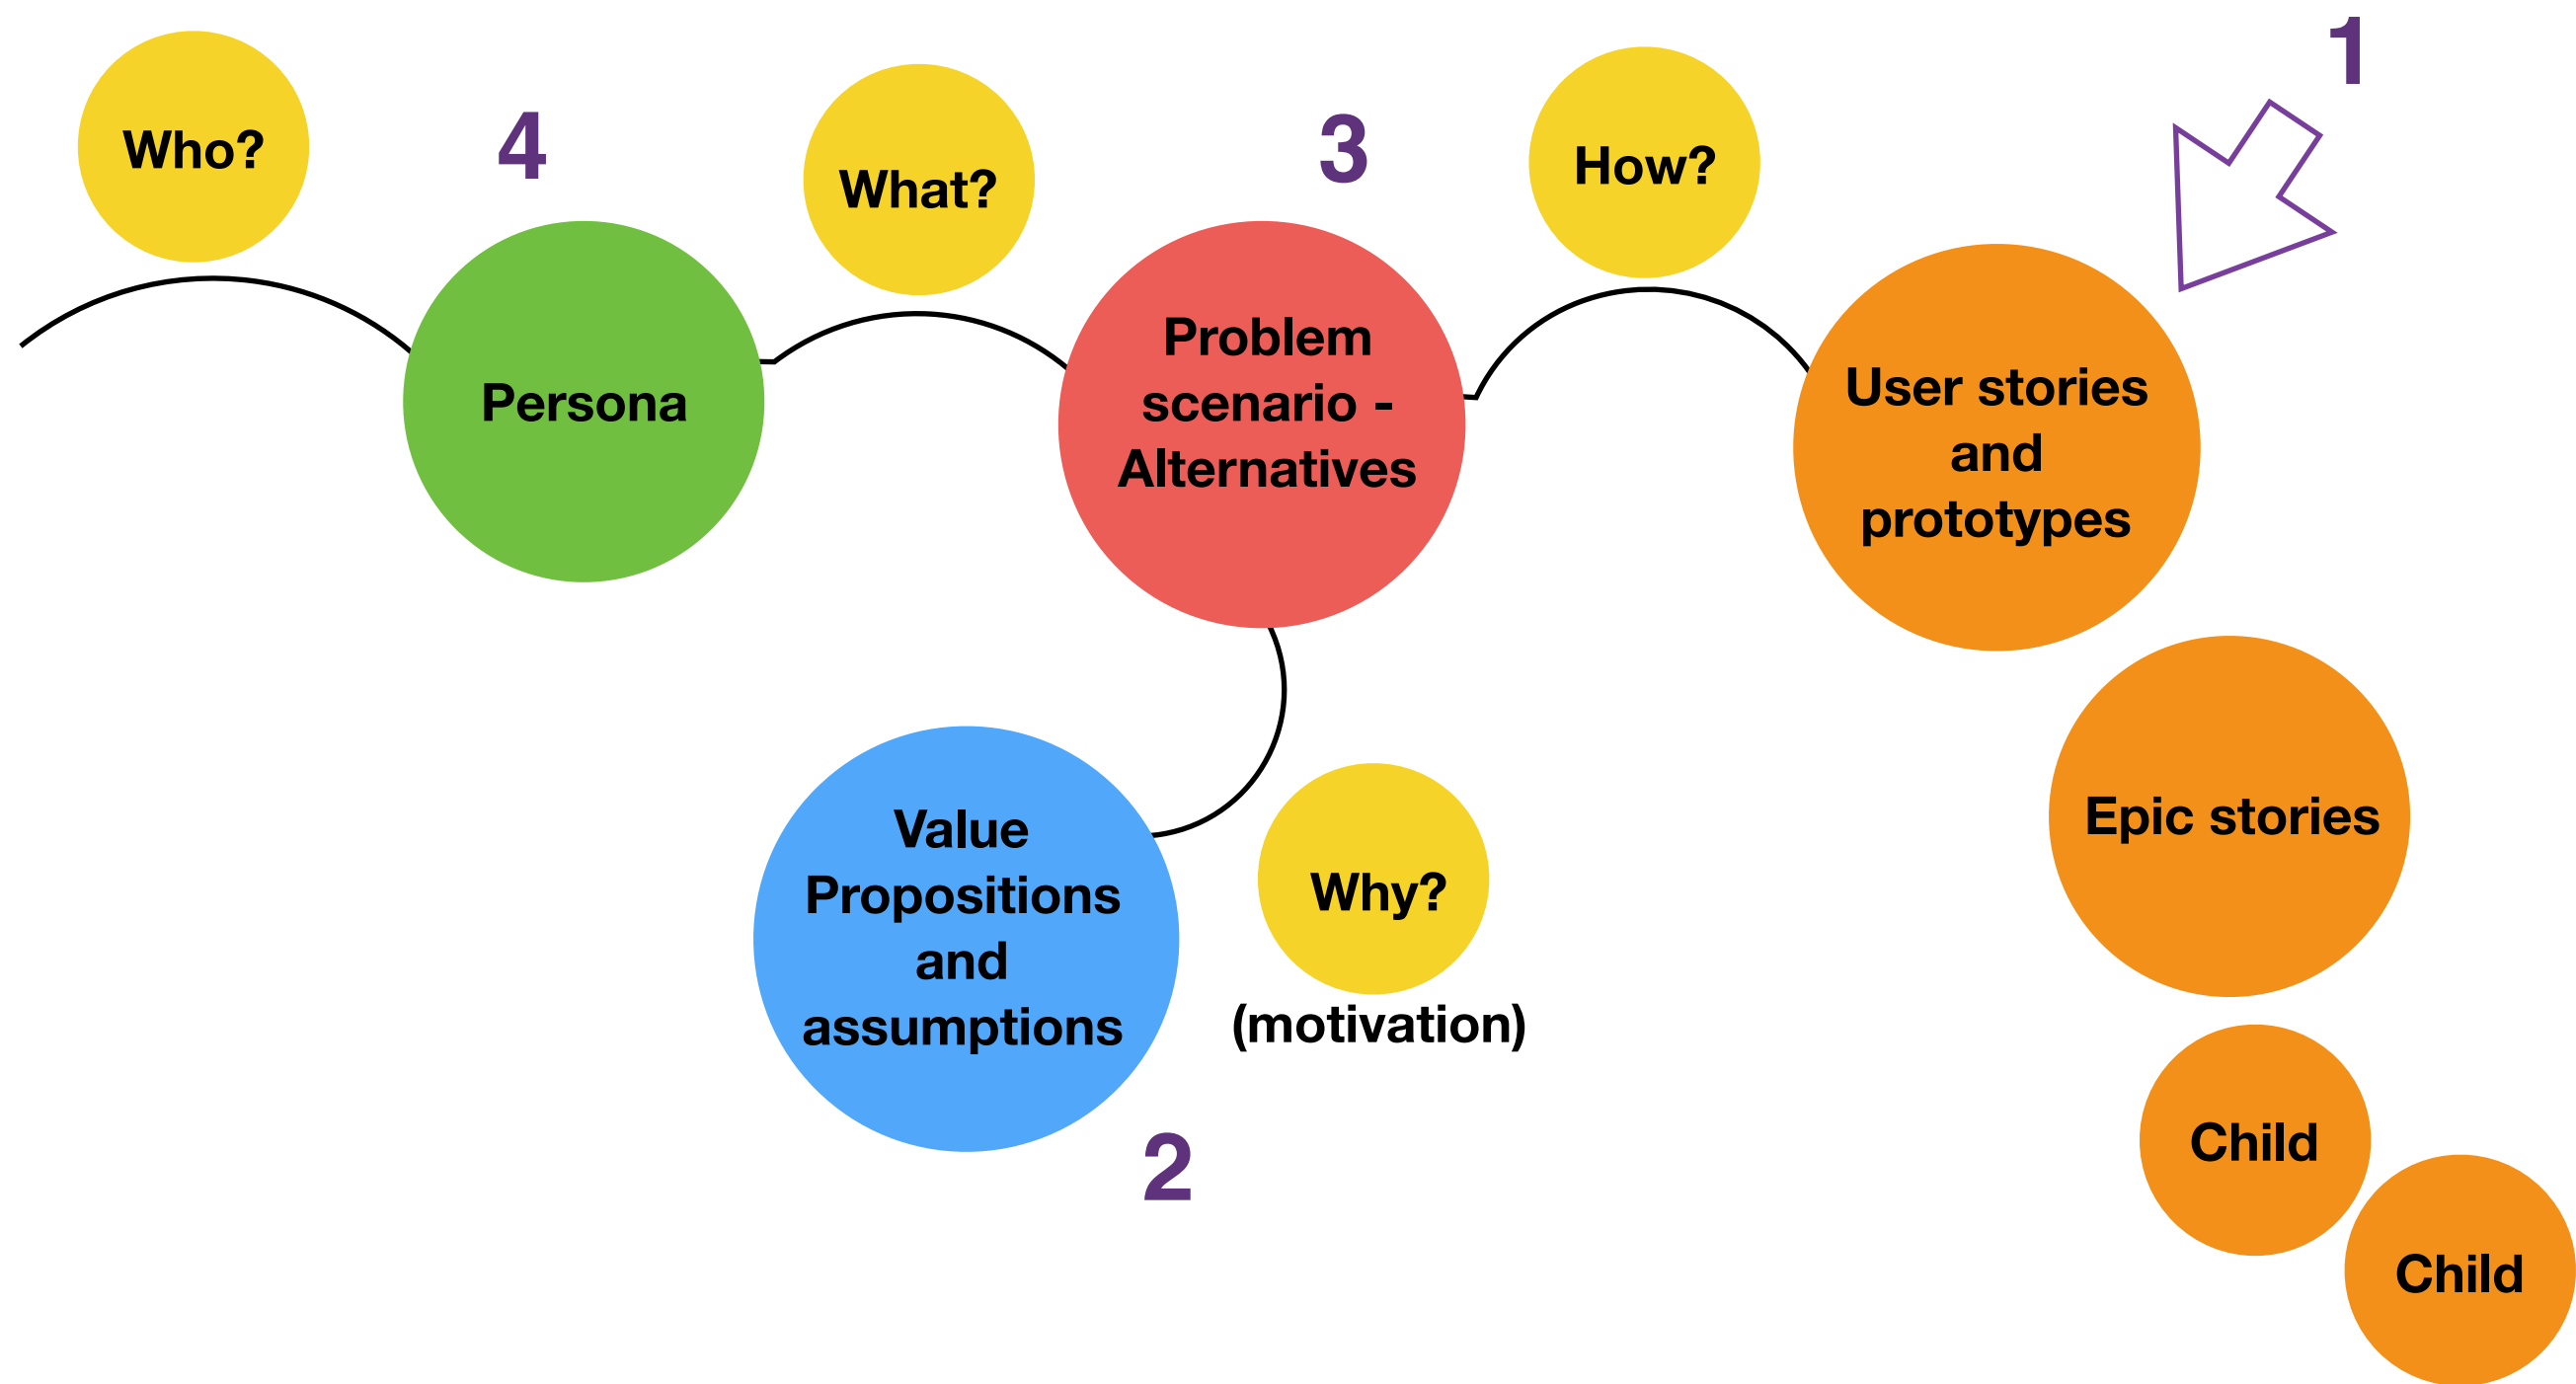

---

**.... and in reverse when I'm at the end...**

---

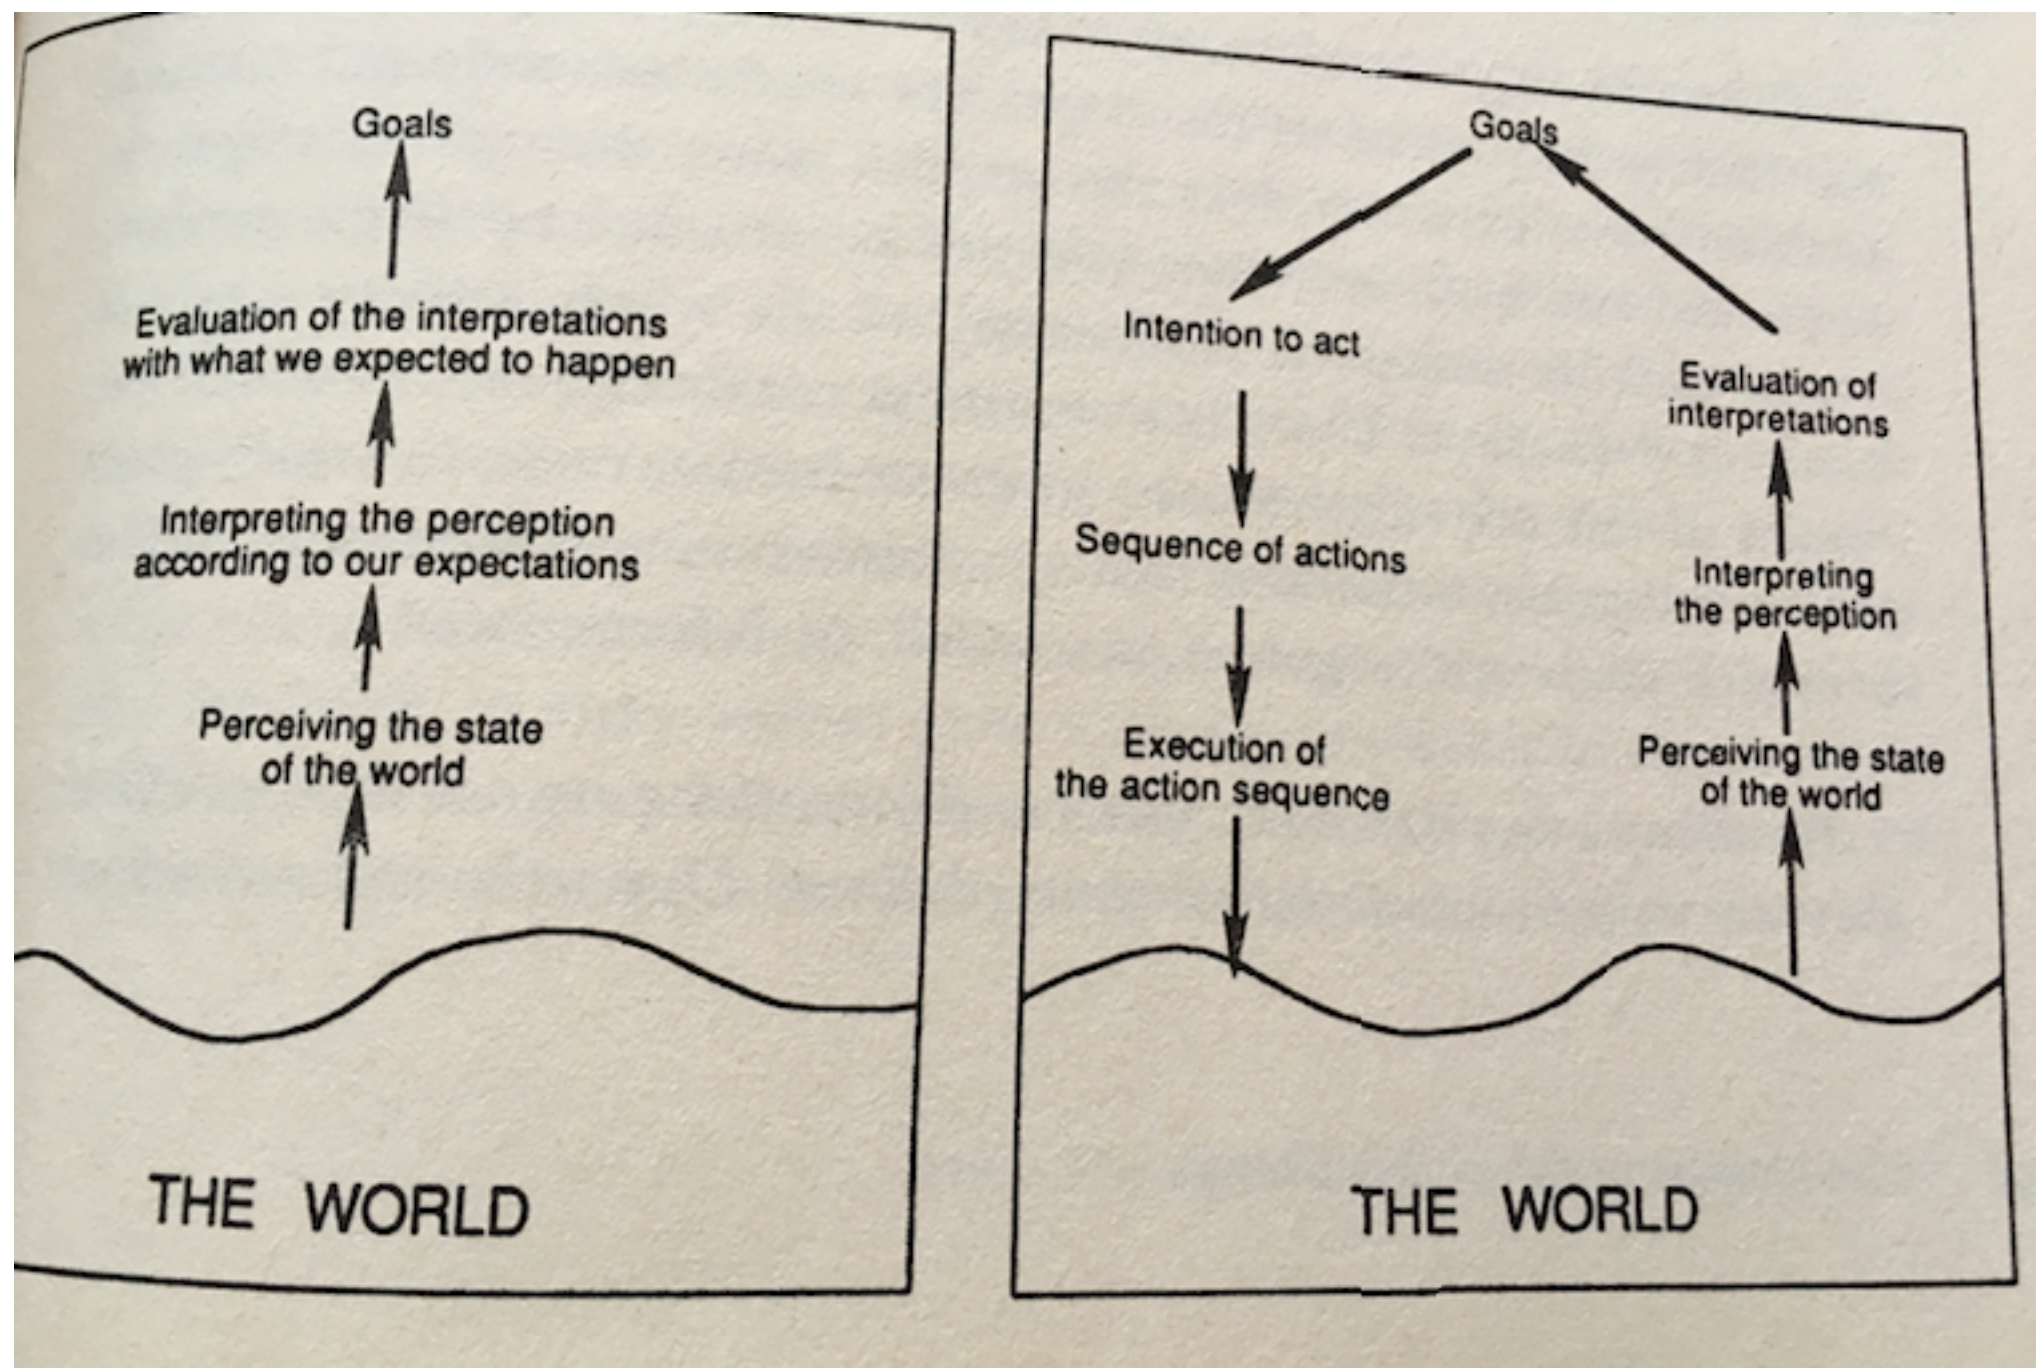

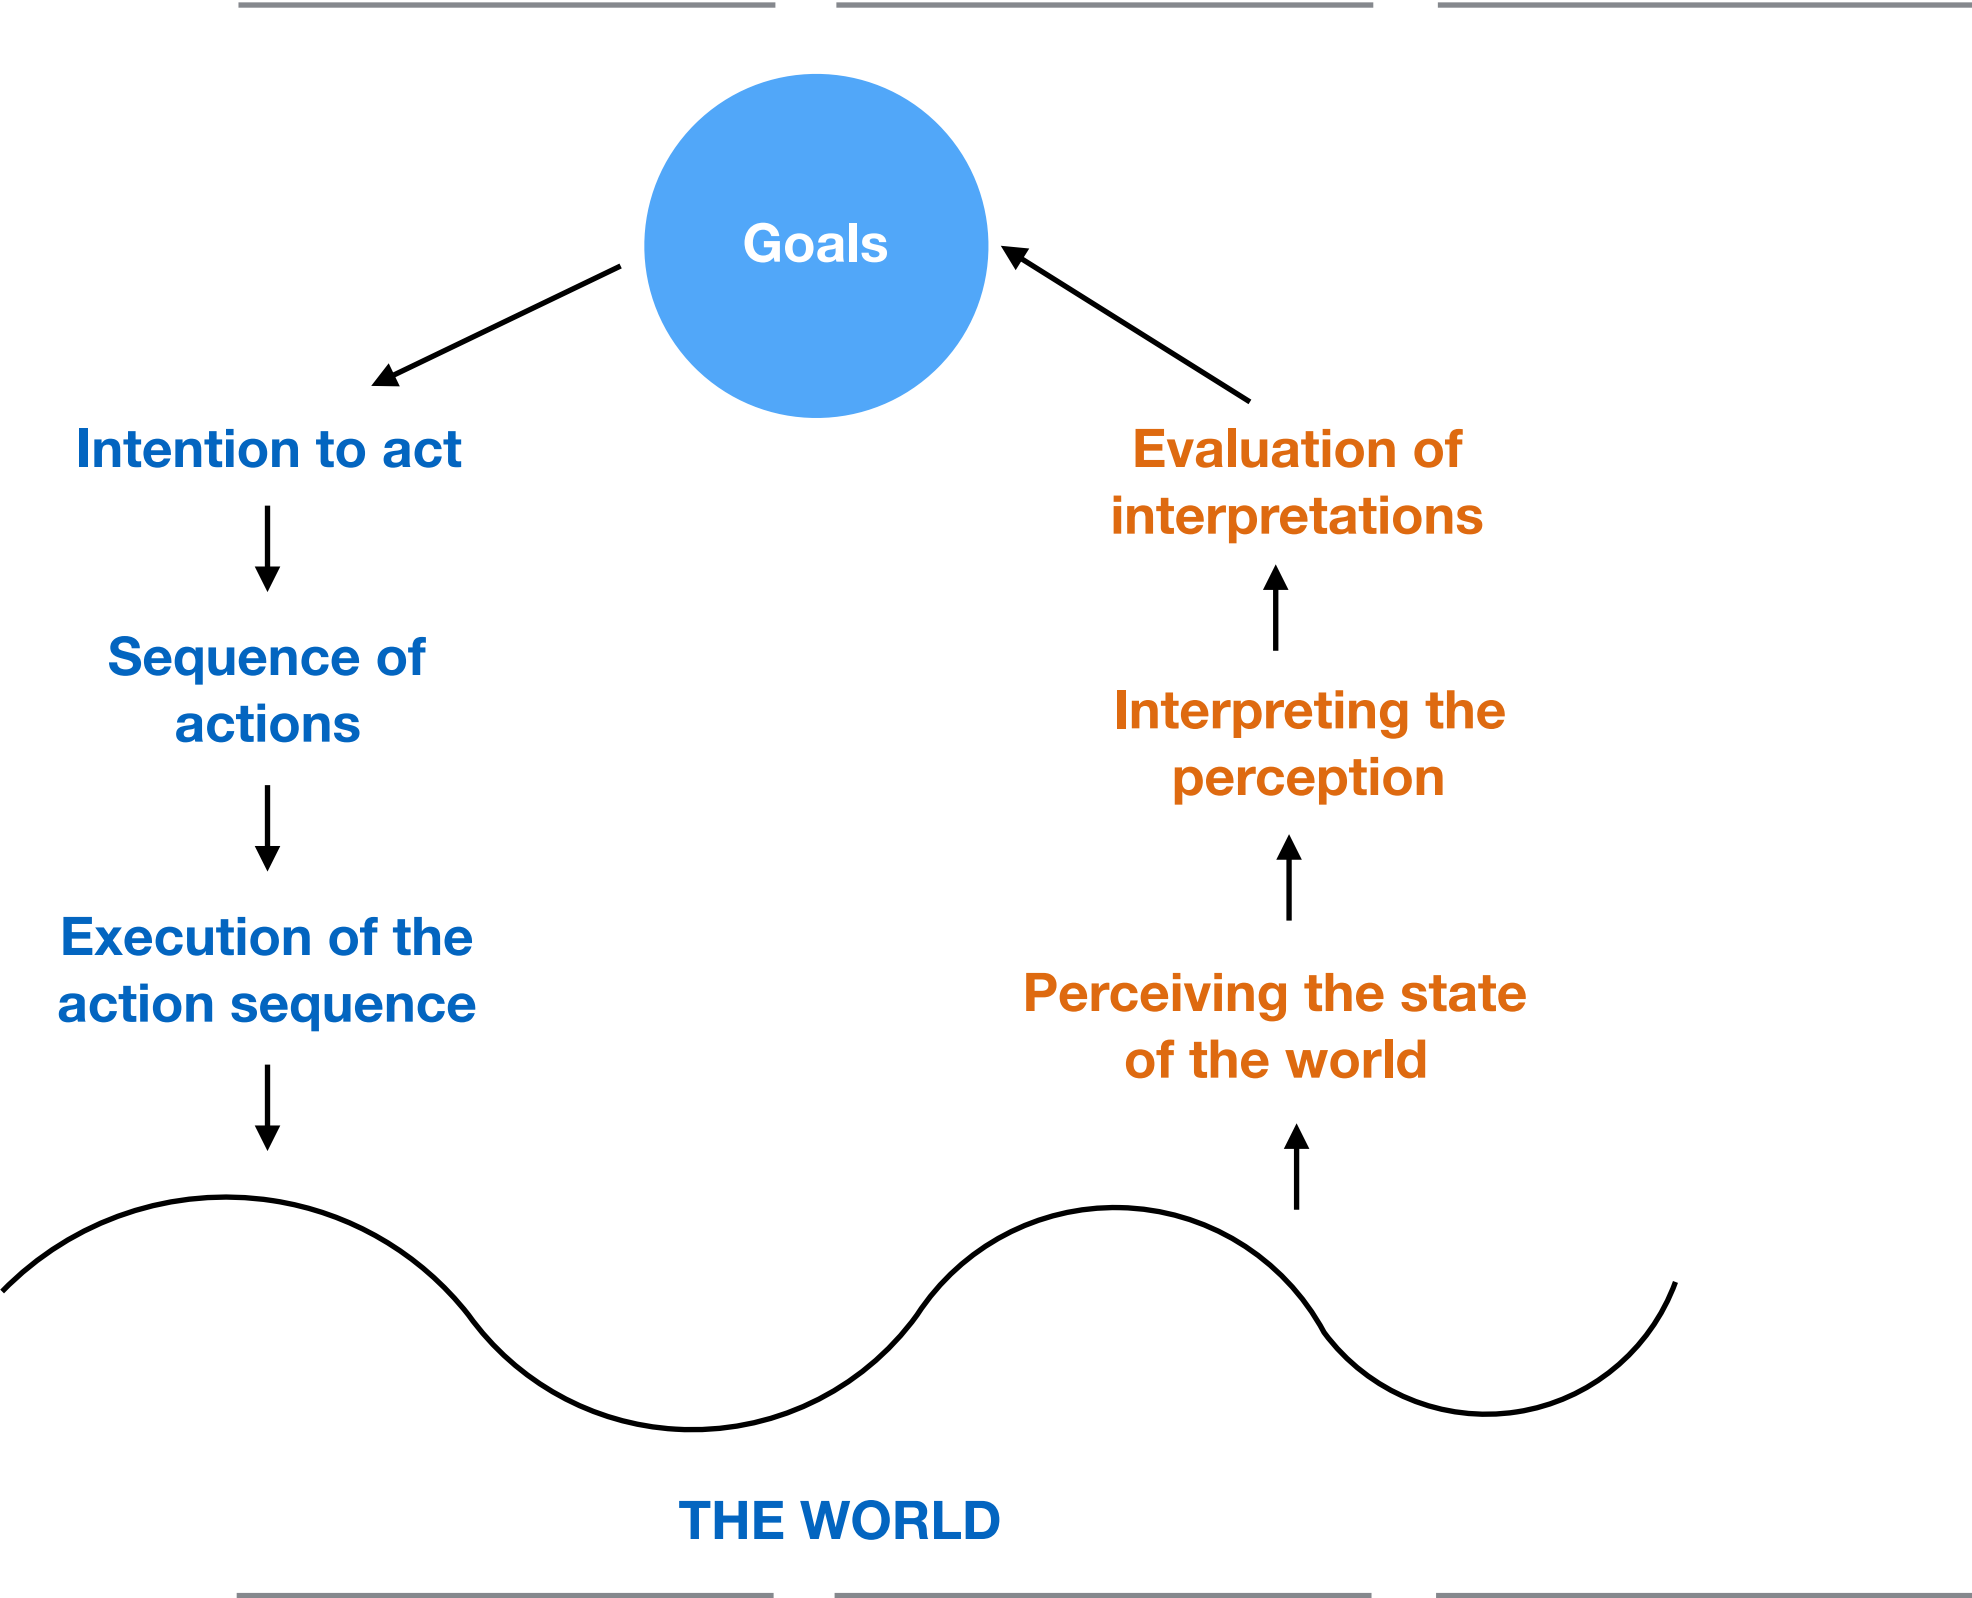

A photograph of Donald Norman, an older man with a grey beard and glasses, wearing a dark suit jacket over a light blue shirt. He is gesturing with his hands while holding several sheets of paper. His right hand is raised, pointing towards the right, and his left hand is holding a stack of papers. The background is dark and out of focus.

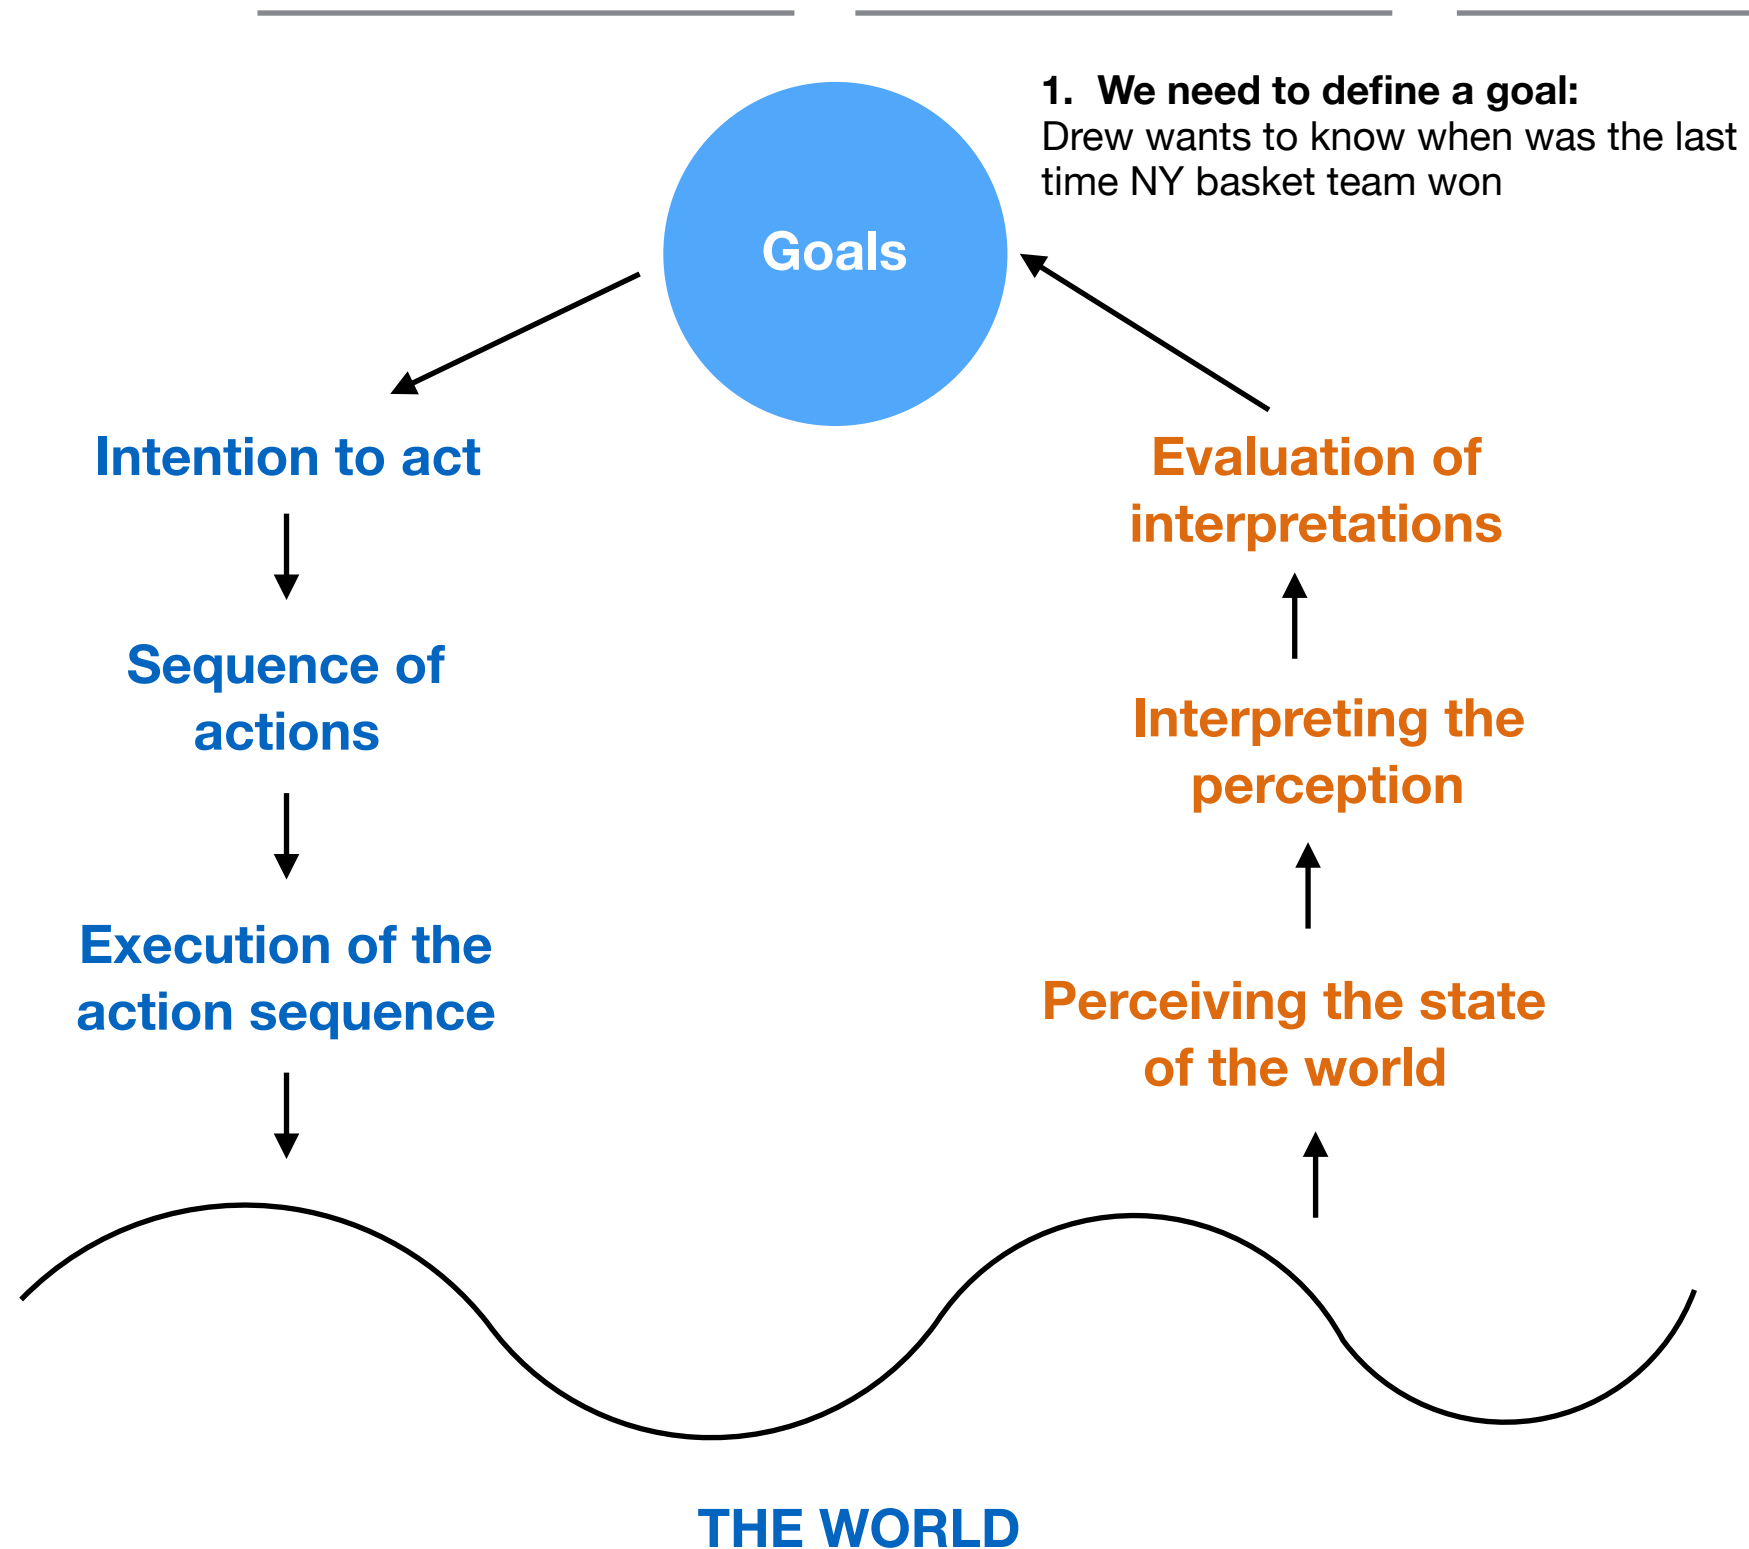

**Donald Norman**

---

## 2 tips for today:

**Don't force the happy path** (a linear path where you have a clear idea of what the user is doing)

**Storyboard** \_ it helps in defining better Epics and defining details

---

**Today:**

**Problem scenario sprint  
(summary version of day 5)**

Work with your Agile team

	Time	Activity
Team	20 min	Pick top problem scenarios (emerged in the interviews)
Team	20 min	Pair problems with propositions
Team	20 min	Stick voting, discussion
	10 min	Break
Alone	20 min	Draft epics
Team	10 min	Present compare
Team	15 min	Draft storyboards (in pairs for converged epics)
Team	10 min	Review, compare, update
Alone	30 min	Draft child stories
	10 min	Break

	Time	Activity
Team	15 min	Let peer-read - discuss
Alone	20 min	Find patterns and comparable
Team	15 min	Review and compare + vote
Alone	30 min	Wireframes
	10 min	Break
Team	20 min	Discuss and review wireframes
